Contact: +91-7378337980

Aspiring Java Developer leveraging a profound background in Software Development for contributing effectively to innovative IT projects and enhancing software solutions with a dynamic organization, preferably in Pune.

Profile Summary

- Gained nearly 3 years of extensive experience in Software Engineering, focusing on Java development and contributing to various projects within the IT Sector.
- Currently working as Software Engineer at Hein + Fricke India Pvt. Limited, actively developing applications utilizing Java, Spring Boot, Primefaces, and JSF technologies.
- Showcased a deep understanding of Cloud Infrastructure Management, especially in utilizing AWS Services for deploying and managing applications in a cloud environment.
- Proficient in leveraging a diverse array of programming languages and frameworks, including Java, Spring Boot, and AWS, to develop innovative solutions that address complex business challenges, showcasing a strong adaptability to evolving technologies and methodologies.
- Capable of managing complete SDLC including design, development, enhancements, customization, requirement gathering & analysis, testing, coding, customer support and training.
- Competent in driving projects and ensuring management of various resources to meet project specifications.

IT Skills

- **Frameworks:** Spring, Spring MVC, Spring Boot
- **Tools:** Postman, Maven, GitHub, Jira, Jasper Reporting, Jenkins, Docker
- **Cloud Technologies:** Amazon AWS, EC2, S3, Lambda, EBS, EKS, Cloud Watch
- **IDE:** IntelliJ-Idea, Eclipse, NetBeans
- **Others:** Java, Java 8, PostgreSQL, Hibernate, MicroServices, Junit, Angular, Solid Principles, Servlets, Git, SOAP, JSF, Restful API's, Primefaces

Work Experience

November 2024 – April 2025

Software Engineer | Hein + Fricke India Pvt. Ltd., Pune

Key Result Areas:

- Engaging in comprehensive sprint planning sessions, contributing to the estimation and allocation of tasks to ensure efficient workflow and project timelines are met.
- Developing robust applications utilizing Java, Spring Boot, Primefaces, and JSF, ensuring adherence to best coding practices and design patterns for maintainability and scalability.
- Documenting application functionalities, providing clear and concise technical documentation to facilitate knowledge transfer and future reference.
- Collaborating with cross-functional teams to gather requirements and translate the same into technical specifications, ensuring alignment with business objectives and user needs.
- Implementing best practices in software development, including version control and continuous integration, to streamline the development process and improve team collaboration.
- Participating in regular team meetings to discuss project progress, challenges, and solutions, fostering a culture of open communication and teamwork.

May 2022 - November 2024

Software Developer | Exocoetus Software Pvt. Ltd., Pune

Key Result Areas:

- Engaged in the full software development lifecycle, from requirements gathering to deployment, ensuring high-quality deliverables that meet client specifications.
- Developed various web-based applications using Java, Spring MVC & Hibernate and contributed towards creating user-friendly interfaces and seamless user experiences.
- Collaborated with team members to design and implement Microservices architecture, which enhanced application scalability.
- Utilized AWS services for application deployment and management, to ensure optimal performance and reliability in cloud environments.
- Conducted unit testing and integration testing to validate application functionality and performance, to ensure adherence to quality standards.

Projects

Ongoing: PCMS

The Parameter Comparison Management Service (PCMS) is a specialized application designed to streamline the configuration and optimization of wind turbines by managing and comparing various parameter sets.

- Debugging and troubleshooting the code-related issues and bugs.
- Participating in sprint planning and estimating.
- Designing, debugging, implementing and timely delivery of user and customer requirements.

2024: ClaimPro

ClaimPro is a software application designed to effectively handle and streamline the process of managing claims within an organization. The primary goal of such a system is to automate and organize the end-to-end lifecycle of claims, ensuring transparency, accuracy, and timely processing.

- Designed and debugged software and ensured timely delivery of user and customer requirements.
- Worked on middleware between application and database using JPA repository.
- Debugged and troubleshooted the code-related issues and bugs.
- Worked on application version controlling tools like Git.

2024: DRS

Device Rental Service Software Project was designed to streamline and automate the processes associated with management of device rentals that helped businesses effectively handle inventory, reservations, customer interactions, and other aspects of their rental operations.

- Designed, developed, and maintained high-quality applications.
- Debugged and troubleshooted the code-related issues and bugs.
- Participated in sprint planning and estimation.

Soft Skills

- Innovation
- Adaptability
- Communication
- Collaboration
- Problem-solving
- Teamwork

Education

- 2021
B.Tech. | M.B.E. Society's College of Engineering Ambajogai | 8.06
